Colour Printing System

- Reliable output of 33 pages per minute
- Compact and versatile, ideal for mid-sized workgroups
- Low energy consumption for sustainability and cost-effectiveness

e-STUDIO339cs

Powerful colour printing for mid-sized workgroups: the e-STUDIO 339CS offers enhanced performance to boost efficiency in your day-to-day business processes. With features like mobile printing and low-energy operation, these devices meet the demands of today's businesses while ensuring high-level data security.

The e-STUDIO339cs also features a Dual-Scan Document Feeder (DSDF) as standard, so you can scan double-sided documents at high speed. The devices scan the original on both sides simultaneously, making the whole process swift and reliable.

Alongside efficiency and flexibility, data security is a top priority across all Toshiba devices. They are designed to master complex and evolving threats, satisfying security requirements and preventing unauthorised access to protect your confidential data. The e-STUDIO339cs is equipped with security features such as Trusted Platform Module (TPM) 2.0 technology. TPM 2.0 has self-encrypting drives which offer comprehensive, hardware-level security against third party access, encrypting data with a unique encrypted key to help ensure that none of it falls into the wrong hands.

As with all Toshiba devices, the quality of both the monochrome and colour output is impeccable. Images and text are reproduced in striking clarity, down to the smallest details, delivering professional-quality results to enable businesses to print more material in-house.
