- Cost-effective and environmentally friendly based on low energy consumption

e-STUDIO409as

The e-STUDIO409as is an advanced MFP system that delivers exceptional functionality and value for money. These monochrome multifunctional devices offer efficiency and ease of use, equipped with features like mobile printing to support today's business processes. In addition, they deliver vital data security on an exceptionally high level.

The e-STUDIO 409as is equipped with a larger, customisable colour touch panel measuring 10.9 cm (4.3 inches) for intuitive, buttonless access to all functionalities and support the most widespread mobile printing standards in the market (Mopria, AirPrint), so users can seamlessly print from their mobile devices without having to install individual printer drivers. The app-ready and cloud-enabled e-STUDIO409as allows users to connect directly to Microsoft SharePoint for seamless access to documents stored in the cloud. With the addition of Toshiba's Cloud Printing Solutions, teams can manage their print jobs with greater control and freedom, enabling flexible printing both to and from their devices with ease.

Alongside efficiency and flexibility, data security is a top priority across all Toshiba devices. They are designed to master complex and evolving threats, satisfying security requirements and preventing unauthorised access to protect your confidential data.

The e-STUDIO409as is equipped with an additional layer of security, Trusted Platform Module 2.0 (TPM 2.0). The TPM 2.0 has self-encrypting drives which offer comprehensive, hardware-level security against third party access, encrypting data with a unique encrypted key to help ensure that none of it falls into the wrong hands. TPM not only provides peace of mind by ensuring an extraordinarily high-level of data security within your organisation, but also enables you to comply with the stringent data security requirements of many corporations and government agencies.
