TOGETHER
INFORMATION

e-Bridge Plus Apps

Pure Plug & Play

With Toshiba e-BRIDGE Plus technology, you can add new features and enhancements as easily as you would apps on your smartphone. Productive, intuitive and always up to date, these apps will further improve your document handling without the need for additional infrastructure.

Toshiba's e-BRIDGE Plus technology is pure plug & play, allowing you to seamlessly integrate these clever apps into the intuitive user interface of all our e-BRIDGE systems. Say goodbye to external servers and cumbersome configurations, and simplify complicated, frequently used operations – simply install and immediately enjoy the many benefits of the innovative PLUS apps.

Even more future-proof

Instantly connect to all popular cloud services, automate processes, or just add new, productive features. The PLUS apps make your Toshiba systems even more future-proof. And best of all there are always new solutions being developed. Start your journey into the future of smart office communication now.

Increase your efficiency

Simplify workflows, optimise processes and increase your efficiency. Our aim is to enhance your day to day workflow tasks, so if you like to make things straightforward and intuitive, then our e-BRIDGE Plus apps are just right for you.

The Apps

Whether you want to scan directly to your cloud storage solution or keep a closer eye on your environmental impact, there's an app for that! Toshiba offers a full range of e-BRIDGE Plus apps designed to help you get the most out of your Toshiba devices whilst minimising set up time. All of our apps are plug and play and we are constantly developing more of them to solve the problems you haven't thought of yet.

e-BRIDGE Plus for Barcode Scan

This app helps you save time and makes your document workflows even more efficient. This app scans your documents for you, automatically detecting and interpreting barcodes on them. By recognising the information precisely, the digitised documents are then automatically stored in previously determined directories and may then be forwarded efficiently from there to downstream workflows.

e-BRIDGE Plus for Google Cloud Print

This app gives you the ability to run your processes smoothly and optimise activities right across your business environment. With this latest app you decide from where you send your print job. With the e-BRIDGE Plus Google Cloud Print app, we give you all the options. Once installed on your Toshiba MFP this latest app will give you freedom to print smoothly from your smartphones, your tablets, and from your Chrome browsers without installing any specific printer drivers - no matter where you are!

e-BRIDGE Plus for Green Information

We all make a conscious effort on a daily basis to do our upmost to protect the environment. However, if you are wondering how to do more for our amazing planet and its inhabitants during your working day, then the e-BRIDGE Plus for Green Information App is for you. This tool helps you keep a really close eye on your print paper usage in the office and your resulting CO_2 footprint. It displays the number of printouts and reused sheets of up to ten Toshiba MFPs and/or reusing units in your network. Sustainability is good for the environment and is, after all, not that complicated. It is now well within easy reach for you too.

e-BRIDGE Plus for ID Card Scanning

Allow Toshiba Tec's ID-Card Scanning app to streamline the task of scanning ID Cards on your Toshiba MFP. This app helps to quickly scan the front and back sides of ID-documents and automatically saves them onto the same page, storing them as a one-page PDF in a pre-defined location in your network. Digital documents created this way can be easily used for further automated processes. And if required, simply print both sides of the original ID-document onto a single page and see how this state-of-the-art apps saves unnecessary handling creating an automated, fool-proof workflow.

e-BRIDGE Plus for Exchange Online

Optimise your daily workflows and save time with the powerful e-BRIDGE Plus for Exchange Online tool. This app smoothly connects your Toshiba Multifunction System to your Microsoft Office 365 environment. It allows scanned originals to be sent to any recipient directly from your Toshiba MFP and without manual intervention. Sent messages will appear automatically in the outbox of your e-mail client. A further example of how Toshiba Technology helps make your work processes even more profitable and streamlined.

e-BRIDGE Plus for USB Storage

We all know a business day seldom goes precisely as planned when you first start off in the morning, right? That is why we believe that you should be prepared for all the changing circumstances that a business day brings. If you think so too, then your Toshiba Multifunction Printer is well prepared to help you do just that. By installing the e-BRIDGE Plus for USB storage app, scanning and printing documents directly and securely from your portable USB device becomes even easier and safer. Enjoy the ease of use this tool brings and increase both your efficiency and your flexibility.

e-BRIDGE Plus for WebDAV

The e-BRIDGE Plus for WebDAV app seamlessly integrates your Toshiba MFP into your server environment. In a blink of an eye, you can browse your WebDAV server structure straight from the MFP control panel. Scan originals at high-speed and directly store the documents in the same folder you can also access from your computer. And printing documents from a WebDAV Server with the app is as simple as scanning – no detours! That's the way to optimize modern office processes and make work life hassle-free.

e-BRIDGE Plus for Zone OCR

Install the e-BRIDGE Plus for Zone OCR app on your Toshiba e-BRIDGE Next device along with Toshiba's Embedded OCR Enabler and benefit from the increased productivity when digitising paper documents. With this tool, OCR recognises up to three different zones consisting of text, numbers and barcodes on each scanned document. The digitised information can then be used to automatically sort and/or serve as folder and file names. Use pre-set templates to improve work efficiency or define OCR zones with a highlighter – for full flexibility. Scan your paper documents at high speed, automate your processes and benefit from the tremendous time-efficiency of this Toshiba tool.

Linking you to the cloud

e-BRIDGE Plus for Box

Integrate your Toshiba device directly with you organisation's Box storage system. This app allows you to print from and seamless scan to folders in you Box storage system. Box offers a single place to manage, secure, share and govern all of the content for your internal and external collaboration and processes.Supports Office 365, Google Suite, Salesforce and Adobe Sign so you can leverage Box as a central content hub.

e-BRIDGE Plus for Dropbox

Dropbox simplifies your work, providing a central place to both access and share files. Optimise the use of your Dropbox and increase your efficiency by integrating the Toshiba MFP into your processes fully & seamlessly. By installing the profitable e-BRIDGE Plus for Dropbox app, you will now be able to scan originals at high-speed into your storage area & print stored documents easily from there too. This will really simplify your processes and measurably increase your day-to-day productivity.

e-BRIDGE Plus for Google Drive

Every organisation is looking to collaborate better internally, so now you can use e-BRIDGE Plus for Google Drive as a powerful tool to help you achieve exactly that. Integrate your Toshiba Multifunction Printer into your day-to-day processes and benefit from its extensive capabilities. With the e-BRIDGE Plus for Google Drive app, you can connect these two systems and increase your productivity at the same time. Scan originals swiftly and save them automatically in your Google Drive cloud storage space. Your electronic documents are then available to authorised colleagues for sharing – at any time, from anywhere and without any limitation.

e-BRIDGE Plus for Microsoft Sharepoint

Boost the functionality of your Microsoft Office 365 environment and seamlessly integrate your Toshiba Multifunction System to improve your day-to-day activities. The e-BRIDGE Plus for SharePoint Online app allows you to connect both systems with the maximum efficiency possible. Scan documents at high-speed directly to your SharePoint environment and make them available to other users. Automate your processes to and print existing data from your SharePoint service on your Toshiba MFP to significantly increase your operational efficiency.

e-BRIDGE Plus for Microsoft Onedrive for Business

Enhance the overall productivity of your Microsoft Office 365 workspace with our exciting new e-BRIDGE Plus for OneDrive for Business app, while taking advantage of the power of your Toshiba MFP. Digitise documents at high speed on your MFP and save them in your OneDrive for Business storage space. Even critical documents are stored there securely can easily be printed or shared with other users in just a few simple steps. With this exciting e-BRIDGE Plus app you will optimise your daily workflows and processes – really saving both time and money.
